Globe never experienced more oppressive weather than prevailed during the week from July 4th to the 11th. On the 4th a maximum temperature of 96 was recorded and the readings of the thermometer at the Belt office on succeeding days were as follows: July 5th, 97; 6th, 99; 7th, 99; 8th, 101; 9th, 102; 10th, 99. These readings are probably nearly correct as indicating the maximum temperatures. At other places in town there were slight variations from these figures. The atmospheric conditions were rendered further uncomfortable by an amount of moisture unusual in this locality, and the days were not only excessively warm, but the nights oppressive. Happily, these conditions were dissipated on Wednesday last by a refreshing rain which perceptibly cooled the atmosphere, and laid the dust. The precipitation measured 57-100 of an inch. The mercury fell from 92, the maximum temperature for the day, to 85.

Mr. Nachtmann, of San Francisco, a brother-in-law of Louis Sultan, visited Globe the present week, on his semi-annual business tour.

## THE MINERAL BELT.

[Flagstaff Champion.]

President Eddy of the Arizona Mineral Belt Railroad arrived here late last night. Briefly stated, we learn that the work of construction will not be resumed until the 1st of September; that the unfortunate matters which precipitated the crisis last fall are in course of adjustment, but that the Atlantic and Pacific—or rather the proprietary companies, the Santa Fe and Frisco—are not willing to advance the necessary funds to pay off the indebtedness and resume work until the crops, especially corn, are more fully assured along their lines.

Mr. Eddy reports the corn crop through Kansas as ahead of anything he ever saw, and thinks there will be no trouble on that score. It is well understood that the Santa Fe system, through failure of crops last year and the unprecedented extension of their system, have been undergoing a great financial strain, but with but little work going on this year and good crops now assured the crisis will be passed and the entire system of which the Mineral Belt will be an important integral, will feel the benefit.

The best of feeling is manifested toward the Mineral Belt by the Santa Fe board and management, and it seems to be a question of time only.

## EDUCATION—ITS IMPORTANCE TO AND BEARING UPON OUR RACE.

The above subject will be treated and elucidated in a lecture by Prof. R. J. Condon, at the Methodist Church, on the evening of Monday July 15th, at 8 p. m. An admission fee of fifty cents for adults and twenty-five cents for children under twelve and over six will be charged. Children under six free. The truth of the science will be demonstrated by pointing to the leading traits in the characters of a member of the audience who may desire such a test. The lecturer will endeavor to render his discourse both instructive and entertaining, and will be prepared to give examinations to those who may desire. Among points considered will be combinations necessary to the make up of the successful men in all their different pursuits of life; what your boy or girl is best adapted to, and will best succeed in.

After repeated efforts to increase mail service to three times a week between Globe and Verde, the effort has at last proved a success, but not until after Marcus A. Smith bequeathed the Post Office Department and insisted, as a matter of justice, that the increase should be allowed. Alonzo Bailey is also to be commended for the interest taken in that behalf. Service is ordered to commence July 16th, and as only sixty hours are allowed for making the trip between the points named, way-postmasters will be required to open, close and deliver the mail to drivers within seven minutes, and should they fail to comply with the law, they will be reported to the Department as non-conforming officers. Intermediate postmasters have nothing whatever to do with reporting time of arrivals of mail at their offices; that duty devolves alone upon the Globe and Verde offices. The days of arrival and departure will be determined to-day. The first mails, under the new arrangement, will leave Globe and Verde Monday morning next, at 5 a. m., or, perhaps, during the heated term, at an earlier hour.

Having been asked whether or not the Assessor or Treasurer of a county now holding office is eligible to a reelection, we have deemed it best to publish section of the act referring thereto in order that the reader thereof may interpret for himself. It reads as follows:

"All county and precinct officers mentioned in this act, for whose election and term of office no other provision is made by this act, shall be elected at the general election in the year 1888 and every two years thereafter, and shall hold the office or offices to which they are elected for the term of two years from the first day of January next after their election, and in accordance with this act, and only one person shall be elected to an office to which are attached offices ex officio; provided, that no Treasurer or Assessor shall be either appointed or elected to succeed himself in such office—nor shall any newly elected Assessor employ as his deputy assessor any person who acted as the deputy of his predecessor."

W. E. Eads, thoroughly exhausted after his arduous labor of watching a mine for several weeks, has gone to the mountains to recuperate, with a party of Phoenixians. The Arizona says the boys went fully prepared for roughing it, taking with them three easy chairs, two cots and a "cul'd ge-man" to cook for them. They left Phoenix in great style in a concord coach drawn by four horses.

J. W. Douglass, tailor and renovator of soiled and soiled clothing, is again in Globe soliciting employment. He also proposes to do house cleaning, and odd jobs with a view of turning an honest penny.

A section of Salt river valley on Wednesday was visited by a flood, occasioned by a cloud-burst. Wheat-fields were also generously bedewed with pluvial favors.

Mr. Nachtmann, of San Francisco, a brother-in-law of Louis Sultan, visited Globe the present week, on his semi-annual business tour.

CHAS. T. MARTIN, Clerk.

The grand jury of Yavapai county in their report recommended that justices of the peace throughout the county bind over all important witnesses in criminal cases. It would not be a bad idea for the same officials in Apache county to do likewise. Such a course would undoubtedly facilitate business in our district court, as it would certainly have a tendency to make witnesses more prompt in their attendance.—St. Johns Herald.

Mrs. O'Leary's Famous Cough kicked over a lamp, and Chicago, the bustling young metropolis of the West, was laid in ruins. This is a striking illustration of the old saying that "great results have small beginnings." The neglected cold, the hacking cough of to-day, may, a few months hence, develop into the direst of destroyers, consumption. Be warned in time. Dr. Pierce's Golden Medical Discovery, if taken in the first stages of this dread disease, is a certain cure. It is also a sovereign remedy for asthma, bronchitis, sore throat, chronic nasal catarrh, and all diseases of the respiratory organs.

The cleansing, antiseptic and healing qualities of Dr. Sage's Catarrh Remedy are unequalled.

Two Ways, Choose Which! There are two usual ways of doing what Nature sometimes does incompletely, namely, to relieve the bowels. One is to swallow a drastic purgative which evacuates profusely, abruptly and with pain, the other is to take Hostetter's Stomach Bitters, the effect of which is not violent, but sufficiently thorough, and which does not gripe the intestines. If the first is selected, the person employing it need not expect permanent benefit, and he cannot hope to escape the debilitating reaction which leaves the organs as bad or worse off than before. If, on the other hand, he resorts to the Bitters, he can rely upon the restoration of a regular habit of body, consequent upon a renewal of a healthy tone in the intestinal canal. Besides healthfully relaxing the bowels, the Bitters arouses a dormant liver, imparts a beneficial impetus to the action of the kidneys, and counteracts the early twinges of rheumatism, a tendency to gout, and malaria in all its forms.
